## WINDRUSH HILL CONSTRUCTION

### INDIVIDUALLY TAILORED HOMES.

When people are looking for quality workmanship and a name they can trust in the home building industry, they turn to the team at Windrush Hill Construction.

Windrush Hill is a full service contracting firm specializing in additions/ renovations and new home project management for clients throughout the Niagara Region.

Since launching in 1996, their company has been involved with a wide range of custom home construction projects throughout the Niagara Region. Windrush Hill provides construction management services for an average of 16 projects annually with most architectural design work being done in house.

"We specialize in giving older homes facelifts including open concept design, new kitchens and bathrooms, as well as

complete exterior facades to bring them up to current standards," says Tony Alfieri, the president and owner of Windrush Hill. "Renovations give me the challenge that I like and the opportunity to work closely with my clients. Together we come up with the right design for their home."

Tony's creative excellence and decades of experience in the custom home building and renovations industry have made him a much sought after commodity with his clients. He also comes highly recommended, receiving most of his work through client referrals.

"I couldn't offer the benefits of value and excellence to our clients without my trades people and suppliers," states Tony. "I seek out the experts in the field and surround myself with a team of people that are at the top of their game." The result is

a skillful team that is dedicated to quality workmanship and commitment to customer service on each and every project.

Windrush Hill is no stranger to critical acclaim over the years, winning a number of impressive construction industry recognitions. In 2008, Windrush Hill received the Ontario Home Builder's Association Award for Most Outstanding Custom Home under 2,500 square feet for "Suburban Style." Most recently, they won the Award of Excellence in the custom-designed home from \$300,000-\$500,000 category at the 2009 Niagara Home Builder's Association Awards.

Being a leader in the homebuilding and renovations industries is a great place to be. But Tony is never one to rest on his laurels. There's always that next project on the horizon, and that new client relationship to build.

"We strive to provide exclusive individual attention to all our clients to make sure their home reflects their design dreams, lifestyle and family values," Tony explains. "It doesn't matter if it's a finished basement, an addition or a custom home. Our goal is to provide superb quality and total customer satisfaction to ensure all our clients can enjoy an individually tailored home." **BL**
